## Powered Air Purifying Respirator

ESAB's EPR-X1 PAPR unit connects seamlessly with all current ESAB prepared for air welding helmets and provides advanced respiratory protection from harmful welding fume particulates.

This PAPR is designed for applications ranging from occasional use to full-time industrial applications. The EPR-X1 offers a robust, compact housing with a powerful blower to ensure maximum life and performance. Check your battery status, fan settings and filter conditions at a glance with quick-access status LED lights. Additionally, the PAPR provides audible and vibratory alerts to notify the user of low air flow (indicating a needed filter change) and low battery conditions.

The EPR-X1's turbo unit is controlled with easily-accessed push buttons allowing three airflow speed ranges of 170/190/220 l/minute. The HEPA-quality, EN12941 TH-3P certified two-stage filter and spark arrestor are easily accessed through a removable front door.

Auto-Darkening Welding Helmet for PAPR Systems

Sentinel A60 Air

## Welding Processes

- Oxy Fuel Cutting
- Plasma Cutting
- Grinding
- Welding, GMAW (MIG/MAG)
- Welding, GTAW (TIG)
- Welding, PAW -Plasma Arc Welding
- Welding, SMAW/MMA (Stick)

The Sentinel A60 Air welding helmet builds on the advancements of the standard Sentinel A60, taking your welding to the next level. A large panoramic view and perfect 1/1/1/1 EN optical clarity provide an even wider view of the weld pool without any distortion.

The reengineered auto-darkening filter (ADF) features new OpTCS™ broad-spectrum light control technology from ESAB, giving you an enhanced True Colour view with reduced eye fatigue for the most demanding days on the job. New 0.5 increment shade adjustments give you more precise control of your view.

The shell retains the signature Sentinel design, and incorporates a new air diffuser screen. A fully-adjustable Halo™ headgear, and external grind mode button complete the most comfortable, highest performance helmet ESAB has ever produced.

- ADF viewing area: 118 x 71 mm (4.65 x 2.80 in.) and intuitive internal ADF controls including sensitivity and delay
- Shade range: DIN 3 / 5–13, adjustable in 0.5 increments and ADF shade lock setting
- ESAB OpTCS True Colour Lens Technology
- On-board memory for up to 9 settings
- Arc sensors: 4
- Fast switching time of 0.08 milliseconds
- Replaceable CR2450 battery
- Low battery, grind mode and shade lock LEDs
